Nyabwari Bosire

Research & Design | Molecular Biologist | Biotechnologist

Eldoret, Kenya | +254711308884
nyabwaribosire@gmail.com | GitHub | Portfolio

PROFESSIONAL SUMMARY

I am a biotechnology graduate with practical experience in molecular biology, biotechnology, bioinformatics workflows and analysis, with strong research skills in health and agriculture disciplines and a strong alignment to one health approach.

EDUCATION

African Leadership University – ALX Africa **September 2025 – April 2026**
Data Analytics

University of Eldoret – Eldoret, Kenya **September 2021 – November 2025**
BSc Biotechnology and Biosafety
GPA: 3.5/4 (Second Class Honours Upper Division)

WORK EXPERIENCE

Technical Lead Research and Documentation **January 2026 - Present**
Health Research Cloud – Nairobi, Kenya(Remote)

- Led research and documentation processes, ensuring clear, organized, and accessible capture of all research output for youth-led initiatives.
- Conducted capacity building sessions on Git and GitHub, enabling team members to collaborate effectively.
- Simplified complex health research findings into actionable insights and inforgraphic for wider understanding.

Molecular Biology Intern **May – December 2025**
Kenya Agricultural and Livestock Research Organization – Nakuru, Kenya

- Assisted in plant pathology diagnostics,applied advanced techniques to detect and manage diseases, reducing fungal infections rate by 15%.
- Extracted DNA from fungal isolates of Fuserium oxysporum , did gel electrophoresis, and prepared PCR products for sequencing.
- Analyzed genetic markers associated with disease resistance in wheat increasing production of new resistant wheat varieties by 10%.
- Performed sequencing and data analysis to identify genetic markers associated with disease resistance in wheat, increasing production of new and resistant breeds of wheat by 10% within a period of 5 months.

Genomic Epidemiology Intern **September – November 2024**
HackBio – Lagos, Nigeria(Remote)

- Carried out literature reviews on the global effects of AMR, quantified effects, to guide in development of mitigation strategies.
- Developed a cholera epidemiology surveillance dashboard using R.

TECHNICAL SKILLS

- **Biotechnology**: DNA extraction, bioinstrumentation, pcr, cell culture, gel electrophoresis, tissue culture, spectrophotometry
- **Bioinformatics**: Variant calling, Genomics, Proteomics, Metabolomics, Meta-genomics, Transcriptomics
- **Data Analytics**: R, Python, Excel, JASP

SOFT SKILLS

- Team Collaboration
- Communication
- Attention to detail and Problem Solving

TRAININGS & CERTIFICATES

- Professional Foundations – ALX Africa 2025(Verify)
- Genomic Epidemiology - HackBio 2024(Verify)

- Data Analytics – ALX Africa 2026(Verify)

REFEREES

Cyrus Kimani
Molecular Biologist – KALRO, Kenya
